## **1.1. Version history**

Version	Date	Details
2.0	20.10.2023	Information about the options of device replacement has been removed.

## **1.2. Introduction**

The following instruction manual describes how to update devices and activate the function of reading smart tachographs and all data from the second-generation driver cards.

1.3. For which devices is it possible to update and activate new features?

## It is possible to update and activate new functions for devices:

1. TachoReader Combo Plus, the serial number of which ends with the letters A, B, AT, C:

2. TachoReader Basic - all devices:

## 1.4. How to update and enable new functions

- **1. Device software update**
- TachoReader Combo Plus (with letters A, B, AT, C at the end of the serial number) download the installer from the website: <u>tachoscancontrol.com</u> (file: TachoReader Combo - Updater [version number].exe).

To perform the update correctly, unzip the downloaded file, start **TRCUpdater.exe**, and follow the steps in the instaler.

## Instruction manual for activating the smart tachograph readout function INELO

### 1.5. Obtaining a code to activate new functions

To generate an unlock code for the new features, you must send to the **International Sales Department** the following data:

- Device ID,
- Contact details.

## e-mail: control@inelo.pl

#### M: +48 539 774 307

The activation code will be sent to the indicated e-mail address depending on the date of purchase of the device – after verification and payment (if the device is not subject to free activation of new functions).

New tachographs **can be activated** via the <u>https://trc-update.inelo.pl/</u>. The system will inform you for which devices activation of support for new tachographs is not possible. Devices covered by warranty can be activated for free. After the warranty expires, activation is chargeable.

### **1.6.** Activating the smart tachograph service

The **activation code** must be entered in the device **configurator**:

- Connect the device to the computer. Enter the disc **PNSTACHO** and run the file **TachoReaderConfigurator.exe**
- Click [Activate] in Configurator, enter the activation code and click [Activate] buton:
